

E03双磁吸子母扣

E03 Double magnetic buckle

拉动手柄解锁

Pulling the handle to
unlock buckle

包上预先通过吸塑或其他方式加工好母扣凹进去的形状。

The shape that has been created by blister or other methods is reserved to recess the female buckle

母扣周边通过高周波
焊接在吸塑片上，
不影响车包防水。

The perimeter of the
female buckle is firmly
welded to the base of the
bag using high-frequency
waves. Ensuring that it does
not compromise the
waterproof feature of the
bag.

公扣通过螺帽收紧尼龙带固定在车架上，这样磁吸可以快速的安上车包，拉动手柄可快速取下车包。

The male buckle is securely fastened to the frame by tightening the nylon belt with a nut, enabling quick installation of the bag by using the magnetic system, pulling the handle allows for swift removal of the bag .
